

BIRDS OF MUNNAR

300 Taxa Checklist

A Species Checklist of the Munnar Hills, Western Ghats, Kerala

Nilgiri Flycatcher

THE WESTERN GHATS

The Western Ghats is one of the world's richest biodiversity regions. Its evergreen forests, sholas, grasslands, wetlands and river valleys support an extraordinary variety of life. The Munnar Hills are home to rich birdlife in all seasons.

ENDEMIC SPECIES

Many Western Ghats birds are endemic, meaning they are found nowhere else on Earth. Species such as Nilgiri Flycatcher, Nilgiri Pipit, White-bellied Sholakili, Malabar Parakeet and Flame-throated Bulbul represent this natural heritage.

ABOUT THIS CHECKLIST

This booklet is created from the attached CSV master list and preserves every numbered row from 001 to 250. Use it as a field checklist while exploring the Munnar Hills.

ACKNOWLEDGEMENT

Bird records and taxonomy are derived from observations submitted to the eBird Munnar-General Area Hotspot (L4199673). We gratefully acknowledge the Cornell Lab of Ornithology and the global eBird community.
